Vent-Axia Connect App User Guide

A product by
Vent-Axia

This guide is designed to aid in the simple set-up and demonstration of the Vent-Axia PureAir Sense Bathroom Fan with the Vent-Axia Connect App.

The Vent-Axia PureAir Sense fan can also be used without the app and can revert to factory settings if preferred.

A product by
Vent-Axia

1. Once you have downloaded the app, simply start by pressing the ⊕ symbol in the top right hand corner of the app to add your new fan.

2. With your fan switched on, press the ⏻ **Function (Power)** symbol in the middle of the fan's touch panel to illuminate all the available functions in blue.

3. Then press and hold the ☰ **Connectivity** icon at the bottom of the touch panel.

Once the symbol flashes, the app and fan are connected.

CANCEL SET UP

5. Give a name to your fan and click **Done**.

If you have more than one fan, you can name the fans to suit such as:

- Family Bathroom
- En-Suite 1
- En-Suite 2
- Spare Room
- Utility Room
- Kitchen

6. Select your newly named PureAir Sense fan to bring up the main Function menu.

As well as a selection list of all the fan's available functions (Odour Sensor, Timer, Humidity, Constant Speed, etc.) quick access **Boost** and **Pause** buttons can also be selected.

The fan's current Speed setting (RPM) is also displayed just below.

7. Select the ⏻ **Timer** function in the Function menu to customise the Fan Speed on this setting between 800 and 2400 RPM, the Running Time and the Delay Start settings.

Select the **<Back** arrow in the top left of the screen to head back to the main Function menu.
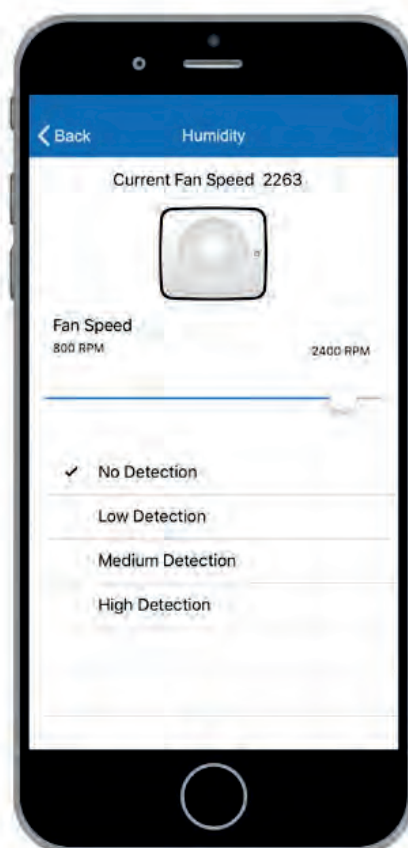

8. Select the 💧 **Humidity** function in the Function menu to customise the Fan Speed on this setting between 800 and 2400 RPM, along with the fan's humidistat sensitivity level between **No Detection**, **Low Detection**, **Medium Detection** and **High Detection**.

Select the **<Back** arrow in the top left of the screen to head back to the main Function menu.

9. Select the ↻ Constant Speed function in the Function menu to customise the Fan Speed on this setting between 800 and 2400 RPM.

You can also set the fan to intermittent or continuous running by selecting the **Disabled** or **Activated** option in the Constant Speed Mode menu.

Select the **<Back** arrow in the top left of the screen to head back to the main Function menu.

10. Select the ☲ Light Sensor function in the Function menu to customise the Fan Speed on this setting between 800 and 2400 RPM.

You can also adjust the sensitivity of the sensor between **No Detection**, **Low Detection**, **Medium Detection** and **High Detection**.

Select the **<Back** arrow in the top left of the screen to head back to the main Function menu.
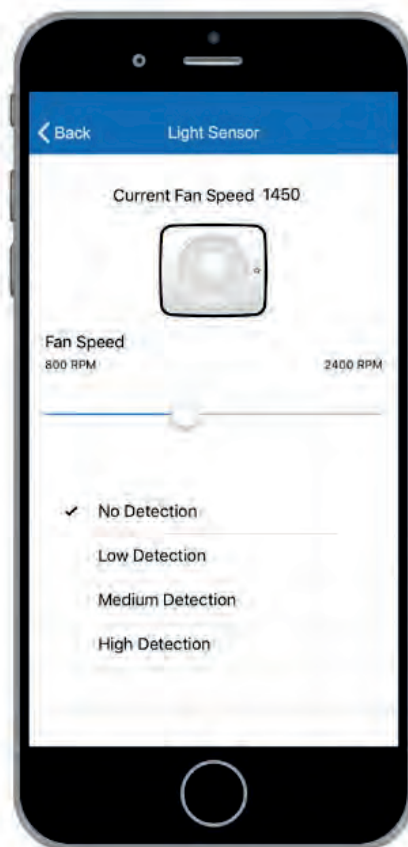

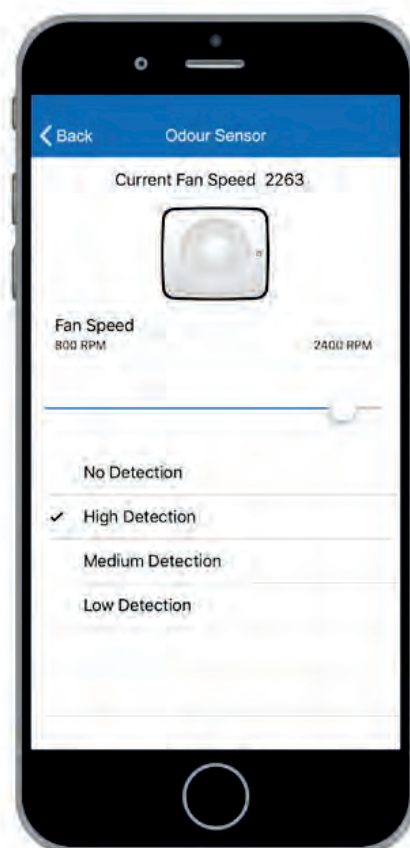

11. Select the ☳ Odour Sensor
function in the Function menu to
customise the Fan Speed on this
setting between 800 and 2400 RPM.

You can also adjust the sensitivity of
the sensor between **No Detection**,
Low Detection, **Medium Detection**
and **High Detection**.

Select the **<Back** arrow in the top
left of the screen to head back to
the main Function menu.

12. Select the ✿ **Airing** function in the Function menu to customise the Fan Speed on this setting between 800 and 2400 RPM.

You can also customise active Airing Settings from **Not Active** up to **120 minutes**.

Select the **<Back** arrow in the top left of the screen to head back to the main Function menu.
